

### Numbering of issues and volumes of *The East Midland Geographer*

The first issue of the *East Midland Geographer* was in June, 1954. Publication continued twice a year until issue number 64 in December, 1985. Eight issues (i.e. June and December for four years) were considered to make up a volume, and for each of the volumes 1-8 an index was published.

Publication has continued twice yearly from 1986, but the format was changed in that year, and the two annual issues or parts have been counted as a volume, with consecutive numbering of the pages. Volume 9 (Parts 1 and 2) was issued in a single cover, as was Volume 12 (Parts 1 and 2). The sequence has therefore been:

Volume 9 (Parts 1 and 2)	June and December	1986
" 10 (Part 1)	June	1987
" 10 (Part 2)	December	1987
" 11 (Part 1)	June	1988
" 11 (Part 2)	December	1988
" 12 (Parts 1 and 2)	June and December	1989
" 13 (Part 1)	June	1990
" 13 (Part 2)	December	1990

Entries in this index are under author's name (with full title of paper), geographical area and topic. The volume and issue numbers and the page numbers are given for each entry.
